FOR IMMEDIATE RELEASE

PHOENIX BASED RECORD CENTER INNOVATIONS, SERVICES HEALTHCARE INDUSTRY AND EXPANDS SERVICES TO INDIAN COMMUNITY

Record Center Innovations Adds To Healthcare Roster Of Clients With Addition of Fort Defiance Indian Hospital on Arizona/Nevada Border

Phoenix, AZ – June 1, 2011 –Phoenix based [Record Center Innovations](#) (RCI), Arizona's solution for off-site records management, storage, document imaging and secure document destruction; has established a partnership with the Indian community by offering services to Fort Defiance Indian Hospital on the Arizona and Nevada border, in addition to servicing other Arizona hospitals and healthcare providers.

RCI has been servicing the Healthcare community since 1998 with their first hospital partnership and have now added a new hospital as a client while also expanding their services outside the Phoenix metro area and to the Indian community. Other current healthcare clients include St. Joseph's Hospital, Mayo Clinic of Arizona, John C. Lincoln Health Network, Banner Boswell, Banner Del E. Webb, Havasu Regional Medical Center and Casa Grande Regional Medical Center plus numerous private practitioners in the medical field.

Healthcare providers utilize RCI to store patient files, manage records and for their Scan on Demand services. As doctors or hospitals need files, RCI is able to access the hardcopy information quickly, scan the necessary information and upload the images to RCI's secure web portal, [RSWeb](#). RSWeb is an online inventory system that allows clients to see what records are stored at RCI, access scanned images, request records to be physically delivered plus much more. Many clients that are outside the Metro area utilize RSWeb to access and manage their off-site records from remote locations across the state and even the country.

"We are very honored to have gained the trust and confidence of the Ft. Defiance Indian Hospital and others in the healthcare industry," remarks Erika Peterson, Vice President of Operations for RCI. "Our commitment to 100 percent file retrieval accuracy combined with enhanced technology via our web portal allows us to service areas outside the Phoenix Metro area in the same way as our clients who are right down the street."

Record Center Innovations also adheres to strict industry standards and is fully compliant with HIPAA regulations. RCI custom tailors programs to fit each provider's needs and offers high level tracking which is necessary for proprietary and important data that healthcare professionals are responsible for and often need on a moment's notice.

RCI's strong focus on customer service has made them Arizona's preferred resource for records storage, document imaging, including scan on demand; and secure document destruction. Their experienced team managers evaluate, define and implement custom programs contingent on a company's needs, industry regulations and competitive pricing. Records can be accessed online 24 hours a day and RCI maintains the utmost integrity and security of all files and records. Customer service is the cornerstone of RCI's business that has secured their success. For more [information](#) visit www.recordcenterinnovations.com or call 602.258.4000.
